About Me

I am a dedicated professional with a profound commitment to integrity, hard work, and innovation. Over the years, I have cultivated a diverse skill set and valuable experiences through my various ventures. As the owner of Rempah Nafarin, I played a pivotal role in raising awareness about the benefits of traditional medicine and herbs, fostering a healthier community. In my role as the founder of PixmaGaming, I contributed significantly to the thriving e-sports community by organizing local tournaments and providing a platform for enthusiasts to connect and compete. This venture required advanced problem-solving skills, technical proficiency in managing online platforms, and the ability to adapt quickly to new technologies—attributes that are directly transferable to software engineering. I am excited to transition into software engineering, with a particular focus on front-end development, where I can leverage my dedication and innovative mindset. I have developed skills in key technologies such as React, Next.js, Tailwind, TypeScript, JavaScript, REST APIs, Python, and Node.js. My technical expertise is complemented by my experience in managing complex projects and my ability to work collaboratively with diverse teams.

Working Experiences

Business owner, Rempah nafarin

2020-july until now

- Raised awareness about the benefits of traditional medicine and herbs, promoting natural health alternatives.
- Fostered a healthier community through educational initiatives and outreach programs.

Education

RevoU

Nov, 2023 - April 2024

Software engineering

During my studies, I have developed skills in key technologies such as React, Next.js, Tailwind, CSS for Front-end, JavaScript, REST APIs, Python for Back-end

Telkom University (informatics engineering)

August, 2012 - 2016, Not graduated

Not graduated due to some reason

Senior High School 88 Jakarta

June 2007 - June 2010

Additional Information

Technical Skills :

Programming Language : Javascript, TypeScript, SQL Query, Python

Framework / library: ReactJS, NextJS, Flask, NodeJS, Supabase

Version Control System : Git, GitHub

Documentation tools : Markdown, Linear

Other Tools : figma, Photoshop, Google Docs, Adobe Movie Maker

Soft Skills :

Time management, collaborative, continues learning, eager to learn new things
